

TECHNICAL SERVICES

Dear Educator:

Scholastic Education is pleased to announce the **July 2009** release of **version 1.9 of our Enterprise Edition Software** including *READ 180*, *System 44*, *Scholastic Reading Inventory*, *Scholastic Reading Counts!*, *Scholastic Phonics Inventory*, *ReadAbout* and *FASTT Math*.

This feature-rich software point release shipped to all Enterprise Edition customers but you must have an active Product Maintenance and Support Plan to take advantage of many of the benefits. **Enterprise Edition v1.9** benefits include:

- **READ 180 Interactive Teaching System (ITS):** Provides anytime, anywhere online access to the rBook Teaching System **with an active Premium Maintenance and Support Plan.**
- **Update Manager:** Lets you schedule electronic **server** updates and software point releases when it's convenient for you **with an active Product Maintenance and Support Plan.**
- **Microsoft Installer (MSI):** Eliminates the need for Windows customers with a software distribution utility, like Microsoft SMS or Novel ZENworks, to manually install software on individual workstations. **You can access the MSI for this release under the Software Updates tab on this Web site.** Microsoft Installers will be available for future releases to customers **with an active Product Maintenance and Support Plan.**
- **Enhancements to six READ 180 Reports:** Provides enhancements to the Results Summary, Demographic Results Summary, Grading, Student Reading, Student Segment Status, and Reading Progress Reports.
- **SRI Improvements:** Accommodates higher Lexile levels by adding new high level test items, the ability to set Lexile level above 1499, and an updated recommended reading list.
- **Vista SP1 and Windows Server 2008 Certification**
- **Supports Scholastic Hosting Services** – A new annual fee-based service whereby a school or district's SAM Servers are hosted and managed by Scholastic. [Contact your Account Executive for more information.]

PLEASE NOTE: Working with Apple, Scholastic has identified changes made in recent versions of Apple's QuickTime software that cause intermittent compatibility issues with the *READ 180* student client for a small percentage of our customers running Windows Operating Systems. Any *READ 180* users currently experiencing this issue, or those who wish to ensure that they do not encounter this issue in the future, should install **QuickTime version 7.1.6** or earlier on their Windows workstations. Scholastic is dedicated to finding a long-term solution and is currently working with Apple on this issue. QuickTime version 7.1.6 is available at: http://support.apple.com/downloads/QuickTime_7_1_6_for_Windows

After installing your v1.9 software, go to the Software Updates tab on this Web site to download the latest software updates. Please note to ensure a successful installation, all Enterprise Edition v1.9 server components must be installed before installing the Enterprise Edition v1.9.1 updates. Should you have any difficulty installing or upgrading your Enterprise Edition software, please contact our Product Support team at 1-800-283-5974.

If you have any questions regarding your software shipment or the status of your Product Maintenance and Support Plan, simply call Scholastic Customer Service at 1-877-234-READ and choose option 1.

Thank you for your continued support in raising student achievement.

Best Regards,

The Scholastic Education Team
