

TECHNICAL SERVICES

Dear Educator:

Scholastic Education is excited to announce the **May 2011** release of **version 2.0 of Enterprise Edition Software** including *READ 180*, *System 44*, *Scholastic Reading Inventory*, *Scholastic Reading Counts!*, *Scholastic Phonics Inventory*, *ReadAbout*, *Expert 21*, *FASTT Math*, *Fraction Nation*, and *Scholastic Math Inventory*.

This feature-rich software point release will be shipped to all Enterprise Edition customers with an active Product Maintenance and Support Plan. **Enterprise Edition v2.0** benefits include:

- ▶ **Browser-Based Software:** Application and media software will now reside on school/district servers (Scholastic servers if using Scholastic Hosting Services) and students will access the programs via a browser for all Enterprise Edition programs. This architecture will make installations and updates significantly easier; eliminating the need to “touch every workstation” every time there is a Scholastic software update!*
- ▶ **Enhanced search capability:** Now finding and moving students within SAM is easier than ever!
- ▶ **Simplified Importing and Exporting:** New tools for creating .csv files streamline the process of importing and exporting data.
- ▶ **Updated *READ 180* User Interface:** We've digitally enhanced the *READ 180* Enterprise Edition software to give it an exciting new look!
- ▶ **Improved Reliability:** Enterprise Edition software is no longer reliant on QuickTime and Adobe AIR, reducing compatibility issues.
- ▶ **New *FASTT Math* Report:** Now, easily monitor schools' usage and gains with the new District Growth and Usage Report.
- ▶ **Improved *Fraction Nation* Performance:** *Fraction Nation* media assets have been optimized for improved performance.
